Read Online Bound Carbohydrates In Nature

Polymers, monomers, and bonding
Carbohydrates, proteins, and lipids are primary nutritional ingredients for humans. The breakdown of nutrients (carbohydrates, proteins and lipids) in the intestines results in small compounds (metabolites) that can pass through the wall of the intestines into the blood.

Carbohydrates also have other important functions in humans, animals, and plants. Carbohydrates can be represented by the stoichiometric formula $(CH_2O)_n$, where n is the number of carbons in the molecule. In other words, the ratio of carbon to hydrogen to oxygen is 1:2:1 in carbohydrate molecules.
