FE545 Design, Patterns and Derivatives Pricing

My favorite is the "Patterns in C" series by Adam Tornhill:. First-Class ADT; State; Strategy; Observer; Reactor; Also: I always think of goto as a great poor man's tool for the decorator pattern.. Update: I'd highly recommend using Rust (rust-lang.org) rather than C except where you are required to use c. Rust has all of the benefits of c, including speed and binary library compatibility with ...

The "design patterns" were only used for trivial examples. The book spends a good bit of time explaining basic C++ (things anyone who has read and understood Stroustrup's "The C++ Programming Language" will be very familiar with), but defers nearly all explanation of the pricing models described to other texts.
