Plant Diversity The Green World - electionsdev.calmatters.org

Here we quantify how that diversity is conserved in ex situ collections across the world's botanic gardens. We reveal that botanic gardens manage at least 105,634 species, equating to 30% of all plant species diversity, and conserve over 41% of known threatened species.

Ex situ conservation of plant diversity in the world's ...

There are an estimated 1.4 trillion individual trees >10 cm in diameter in the tropical and subtropical forests that harbor most of the world's plant diversity (Crowther et al., 2015), and trillions more small trees, shrubs and herbs, so it is easy to overlook the last few individuals of a threatened species, particularly when the key characters for identification are high up in the canopy, as ...
