Metal Building Product Systems | Nucor Building Systems
Pre-engineered buildings cost less than most new construction, and because they use a standard, single-size nut and bolt, they assemble quickly, often erected within a day. They are built with Galvalume Plus, a 100% AZ180 material using a specialized zinc-aluminum alloy that offers corrosion resistance and heat reflectivity. 1 2

General Steel Buildings: Same Day Pricing in 3 Easy Steps
Within some geographic industry sectors these buildings are also called pre-engineered metal buildings (PEMB) or, as is becoming increasingly common due to the reduced amount of pre-engineering involved in custom computer-aided designs, simply engineered metal buildings (EMB).

Pre-engineered building - Wikipedia
Pre engineered buildings are factory-built buildings of steel that are shipped to site and bolted together. What distinguishes them from other buildings is that the contractor also designs the building - a practice called design & build.
