Problem Of The Month Perfect

The Problems of the Month are organized below by grade level and main topic for that level. These grade-level expectations are just estimates and should not be used as an absolute minimum expectation or maximum limitation for students. The structure of a Problem of the Month is a shallow floor and a high ceiling, so that all students can productively engage, struggle, and persevere.

Download Problems of the Month | Inside Mathematics

The Problems of the Month are non-routine math problems designed to be used school-wide to promote a problem-solving theme at your school. Each problem is divided into five levels of difficulty, Level A (primary) through Level E (high school), to allow access and scaffolding for students into different aspects of the problem and to stretch students to go deeper into mathematical complexity.

A month whose 1st date comes on Monday and all the Sundays in that particular month follows the date pattern of 7 14 21 28 is known as Perfect Month. The name Perfect comes from the fact that it follows table of 7 which is the number of days in a week. Also, monday is considered as the first day of the week, hence coming of monday on the 1st date of a month is considered as Perfect Month.
